DETAILED ACTION

Applicants amendment filed February 25, 2008 has been received and entered.

Claims 20 and 22 have been cancelled. Accordingly claims 1-19 and 21 are pending in

the instant application, of which claims 19 and 21 have been withdrawn from further

consideration as being drawn to a non-elected invention.

All grounds of rejection in the Office Action mailed September 24, 2007 are withdrawn.

The following new grounds of rejection are applied to the claims:

Claim Rejections – 35 USC § 112

1. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite

for failing to particularly point out and distinctly claim the subject matter which applicant

regards as the invention.

The claim is vague and indefinite in the recitation of an antibody which is "lgT."

While antibodies are recognized to fall within distinct classes: IgG, IgA, IgM, IgD, and

IgE, the metes and bounds of an antibody classified as IgT is unclear. Clarification is

requested.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Application/Control Number: 10/559,148 Page 3

Art Unit: 1645

2. Claims 1-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-18 are directed to antibodies which have the same characteristics and utility as antibodies found naturally and therefore does not constitute as patentable subject matter.

In the absence of the hand of man, naturally occurring products are considered non-statutory subject matter. Diamond v. Chakrabarty, 206 USPQ 193 (1980). Mere purity of naturally occurring product does not necessarily impart patentability. Ex parte Siddiqui 156 USPQ 426 (1966). However when purity results in new utility, patentability is considered. Merck Co. V. Chase Chemical Co. 273 F. Supp 68 (1967). See also American Wood v. Fiber Disintergrating Co., 90 US 566 (1974); American Fruit Growers v. Brogdex Co. 283 US 1 (1931); Funk Brothers Seed Co. V. Kalo Innoculant Co. 33 US 127 (1948). Filing of evidence of a new utility imparted by the increased purity of the claimed invention and amendment to the claims to recite the essential purity of the claimed products is suggested to obviate this rejection. For example, "An isolated antibody..."

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Habermann et al.

The claims are directed to a pharmaceutical composition comprising a first specific binding agent selected from an antibody or a large binding fragment of an antibody which specifically binds a target toxin, and a second specific binding agent which comprises a small binding fragment of an antibody which binds said toxin.

Habermann et al (Med. Microbiol. Immunol. Vol. 161, pp 203-210, 1975) disclose of an isolated composition of human antibodies which bind to botulinum toxin A, B, and E. (See abstract). Habermann et al further disclose of administering the composition of antibodies to animals to protect against the sequelae of botulinum toxin A and B. Habermann et al further disclose the serum to contain 3.2U anti-A and 2.5U of anti-E.

Given that Habermann et al disclose of pharmaceutical compositions comprising antibodies to botulinum toxin A (first specific binding agent) and botulinum toxin E (second specific binding agent), which are human antibodies, the disclosure of Habermann et al is deemed to anticipate the instantly filed claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Navarro whose telephone number is (571) 272-0861.
